Mexico City, Mexico · serdiopedro@gmail.com · linkedin.com/in/psh2323 · github.com/peds24

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C/C++

Frontend: HTML, CSS, React, UI/UX Design, Figma

Backend: Node.js, Quarkus, REST API Integration, Asynchronous Programming

Data: SQLite, JSON data modeling

Cloud & AI: Google Vertex AI, Gemini, Containerized Microservices

Tools: Git, Visual Studio, Vite, Linux, Windows, macOS

EXPERIENCE

Software Engineer Intern — Banorte

CDMX, Mexico · July 2024 – October 2024

- Created an efficiency-focused Proof of Concept application that automated document template generation and form completion, transforming a labor-intensive 8-12 week process into a streamlined one-week workflow.
- Designed and implemented a microservice-based cloud architecture using Java/Quarkus, featuring containerized deployment for a Gemini-powered conversational AI application.
- Engineered JavaScript-based frontend components that interfaced with backend services and Google Vertex AI for intelligent natural language processing capabilities.

Software QA Intern — Grupo Caliente

CDMX, Mexico · July 2023 – August 2023

- Gained extensive experience with agile workflows, sprint planning, and cross-functional collaboration in a fast-paced software development environment, learning to prioritize bug fixes and feature development based on business impact.
- Collaborated effectively across multiple development teams including Back End, Front End, App Dev, and Web Dev for major betting websites www.caliente.mx and winner.mx.
- Ensured overall quality of new features and enhancements across desktop and mobile platforms through comprehensive testing procedures.

PROJECTS

WebScribe — Developer Journal WebApp — Front-end Developer

HTML, CSS, JS

- Designed and developed a local-first developer journal using HTML, CSS, and JavaScript, focusing on lightweight and responsive functionality.
- Created UI/UX design systems, including animations, color schemes, and layouts, informed by wireframing, user stories, and product research.
- Utilized Figma for mock-ups and animations to refine designs before implementation.

Digital Book Library Tool — Fullstack Developer

Python

- Developed a full-stack Python application integrating the Google Books API for metadata retrieval with data storage that manages diverse media types including books, comics, and manga.
- Implemented multiple data input methods including manual entry, individual ISBN lookups, and bulk imports to streamline collection management and reduce cataloging time.
- Designed a modular, extensible codebase with clean architecture principles that separates API handling, database management, and core functionality for maintainability and future expansion.

Pokémon Vault CLI — Full-Stack Developer

Node.js, SQLite

- Built a command-line application for searching and managing Pokémon cards using Node.js and the Pokémon TCG API, streamlining card collection workflows.
- Implemented a local-first SQLite database to store and filter cards, reducing search-to-save flow from 6+ manual steps to a single command.
- Designed modular code architecture with separate layers for API integration, database operations, and CLI utilities, improving maintainability and scalability.

ADDITIONAL EXPERIENCE

Sales Associate — UCSD Bookstore

San Diego, CA · May 2022 – March 2025

- Provided personalized assistance and guidance to customers, creating a positive shopping experience through effective communication and building rapport.
- Played a pivotal role in achieving sales targets, promoting Apple products, handling transactions, and keeping an organized and efficient workspace.
